A better heater is a better pool.

Shelve the shivers and bring on the splashes, even for those spontaneous swim parties. Sound inviting? The superior heating technology of the ETi® 400 & ETi 250 delivers on a cannonball-able peace of mind. It's the powerful heater whose benefits are so standout, they'll have you basking for more.

A durable and dynamic duo.

The ETi 400 & ETi 250 are a terrific tag team, offering flexible heating to suit any pool. That's because both the ETi 400 & the ETi 250 are designed to accommodate whatever makes your pool so fun in the first place: those flowing features, that powerful filter, those Marco Polo distances, even that nighttime mood lighting.

High-Efficiency Heater

See how this power couple brings the heat.

- **Up to 96% Thermal Efficiency.*** For every \$1 of natural gas that's piped into the heater, 96 cents go directly to heating your pool. That translates into faster heat-up times and bigger energy savings for you.
- **Corrosion-resistant TitanTough™ Direct-Fire Titanium Heat Exchanger** is a tough heat exchanger that ensures you years of high-quality, trustworthy warmth.
- **Upgrade from the MasterTemp® High Performance Heater** with a drop-in replacement that has similar parts.
- **Flexible installation options** include easy venting and a multiple keypad interface that can always face the way you need it to for headache-free access.

Blazing-fast heat-up times that can help keep your pool energy usage low.

Get the most out of your heater with heat-up times that can make a last-minute swim or spa a warm delight. Regardless of whether you've planned for your next swim, your heater can save the day—as well as save up to 14% on energy costs compared to a traditional gas heater.**

On average, the ETi 400 and ETi 250 save 14% on energy costs compared to a traditional gas heater.

ETi® 400 = ■ ETi 250 = ■

*ETi 400 is 96% efficient. ETi 250 is 94% efficient when operated on natural gas and is 96% efficient when operated on propane with available conversion kit.

**All calculations are estimates. Actual results may vary due to a range of factors including, but not limited to: environmental conditions, pool type/construction/materials/configuration, geographical location, installation details and various operational parameters. Cost savings estimates are based on 65°F air temperature and 82°F water target for an uncovered pool operating 180 days under moderate wind conditions and the cost of natural gas is \$1.22 per 100,000 BTU and comparing energy use to a gas heater that is 82% efficient. For assistance with sizing and selecting a pool heating product, please consult a swimming pool professional.
